

ACREAGE: 65.0 | YEAR ACQUIRED: 1961, 1964

The Edna W. Spurgeon Woodland Reserve was the first ACRES property. It's an area of low ridges, or kames, left by glaciers and cut by glacial meltwater. A climax forest of beech, sugar maple and tulip trees that are among the largest in the state covers the area. Beneath the trees grow large-flowered and sessile trillium (also known as toadshade), blue-eyed Mary, bloodroot, hepatica, celandine poppy, Dutchman's breeches and squirrel corn.

DIRECTIONS:

From Ligonier at SR 6 and SR 5, take SR 6 east 2.6 miles to 600 W and turn left (north). Travel 2.25 miles to the preserve on the right.
